

## Data Sheet

# Micro Channel Heat Exchanger Type **MCHE D1200-C**

Condenser – standard series

D1200-C is ideal for use in a number of various applications, such as Residential AC, Condensing units, Air driers, Cabinet cooling and Indoor display.

MCHEs have an ingeniously simple all-aluminum design that is not only lightweight but also prevents galvanic corrosion.

The refrigerant-carrying tubes are formed to optimize heat transfer, enabling the production of more compact, but equally effective, cooling solutions. The smart louvered fin design maximizes surface contact, reducing the air-side pressure loss, improving efficiency and reducing noise levels.

**Features:**

- Reduce refrigerant system charge
- Improve efficiency – More compact/better COP/increased capacity
- Cost - Less sensitive to fluctuations in raw material prices
- Better corrosion characteristics due to all-aluminum design

## Mounting

Figure 2: Mounting

Aluminum MCHEx expand and contract when exposed to big temperature changes. Installation supports/brackets must allow the MCHEx to move in two dimensions.

## Standard connections

The product is equipped with standard copper pipe connections for easy mounting. Never bend or stress the inlet/outlet connections during mounting, and design installations to avoid vibration in operation.

## Bending

Micro Channel Heat Exchangers can easily be bent to fit in any application. Ask your local Danfoss Sales representative for advice.
